- Denial Management support offered to medical practices and hospital groups
- Live-Chat
- Grand-Round Forum

Cash Crunch to Cash Flow

In this economic time, cash is king and the question is: How's your cash flow?

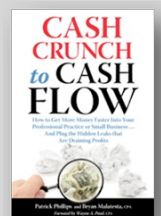

What is your practice actively doing to increase cash flow? Do you have a cash flow plan?

Let me give you three topics to think about:

- Web-based electronic billing;
- A patient payment plan to recover client funds;
- A collection system, not a bill collector.

In times of uncertainty, core systems and processes become critical! Once patient care has been handled, the issues of billing, payment, and collection rise to the forefront. Please take a moment to review your systems to assure yourself and your staff that things will be alright.

Cash Crunch to Cash Flow
